Good Communication skills,
Ability to work effectively in a collaborative team environment,
Organized and able to deal with multiple work load at the same time,

PROJRCTS

Restaurant website (HTML, CSS, JavaScript, Python Django**)**   Click Here
restaurant website using a combination of HTML, CSS, JavaScript, Python Django, and SQLi. The website offers an intuitive and responsive user interface, showcasing the restaurant's menu, special offers, and contact information. Users can browse dishes, place orders, and check for updates in real-time. The backend, powered by Django, ensures smooth data management and secure handling of customer information. With SQLi for database interaction, the platform efficiently stores and retrieves data. This project integrates modern web technologies to deliver a seamless dining experience for users and robust functionality for administrators.

Real-estate Website (HTML5, CSS3, JavaScript and Gshap)   Click Here
Glassy, static real estate landing page using HTML5, CSS3, and JavaScript, combining modern CSS components for an interactive and responsive user experience. The project is fully completed, with a focus on clean design and smooth functionality. it's completed only 4 hours
